akashboobalan001@gmail.com

Puducherry -605008, India

SUMMARY

Motivated and knowledgeable software developer with hands-on experience in designing, developing, and integrating software systems. Well-versed in Java and Python, proficient in UI/UX design principles, SQL, HTML, and CSS, and capable of utilizing Power BI, Excel, and logo creation tools. Passionate about exploring emerging technologies and applying programming and analytical skills to create impactful digital solutions, particularly in the realm of web development and data analytics.

EDUCATION

Acharya College Of Engineering Technology- Puducherry

June 2021 – May 2025

Currently pursuing B.Tech in Computer
Science and Engineering | CGPA: 7.9

Sabari Vidhyashram Higher Secondary School-Puducherry

June 2020 – May 2021

Higher Secondary Education (XII) | Percentage: 71

Sri Ramakrishna Vidyalaya Gurukulam Higher Secondary School- Ulundurpet

June 2018 to May 2019

Secondary School Leaving Certificate (SSLC) |
Percentage: 62

TECHNICAL SKILLS

- Programming Languages:** Java, python, HTML, CSS
- Databases:** MySQL
- Tools/Platforms:** Power BI, Microsoft Excel, Git, GitHub
- Design Tools:** Figma, Canva
- Other Skills:** UI/UX Design, Logo Creation

CERTIFICATIONS

- Udemy Certification in MySQL | Apr 2025
- Main Flow Certification in MERN Stack | Jun 2024 – Aug 2024
- TechnoHacks Certification in Web Development | Jan 2024 – Feb 2024

INTERNSHIPS

Web Development Intern At Main Flow Services And Technologies

Jun 2024-Aug 2024

- Developed and maintained web applications using the MERN stack.
- Enhanced the application by implementing key features and ensuring responsive design.
- Integrated Google Analytics 4 (GA4) for tracking user behavior.
- Utilized Redis for efficient data management and caching.

Hardware Intern Trainee At Aims Technologies

Mar 2023

- Completed a training program focused on computer assembly.
- Developed practical skills in assembling and troubleshooting computer hardware components.
- Enhanced understanding of computer architecture and hardware integration.

PROJECTS

Adaptive Web Security Framework Using Hybrid Security Mechanism - MERN Stack

Oct 2024 – April 2025

Role: Front-End Developer & UI/UX Designer

- Developed a modular NPM Package integrating RBAC, API Gateway Protection, JWT Authentication, and Behavioral-Based Dynamic Encryption.
- Demonstrated real-world security threats by simulating vulnerabilities in the absence of these mechanisms.
- Focused on easy integration, allowing developers to adopt a plug-and-play security layer in web applications.
